## PROJECT

**Capstone Project (Final Year Project)**
Programmed and Designed a Fully Functional Video Game using Unity and C#.
The game titled "The Light at the End of Space" consisted of mechanics such as health & ammo system, random item drops, enemy spawns, and a procedural stage generator that generates a new and unique level every time the game starts. Developing the game presented me with challenges on how to take an idea and turn it into reality and how to overcome them. I was the leader of the group of 3 and was responsible for most of the elements in the project. I received an A- for this course.
